

IMAGE ASSETS NEEDED

sharongunawan.com -- filenames & specs to drop into public/images/
Last updated: 2026-06-30

HOME PAGE -- HERO

avatar.jpg ~1:1, 600x600px min
Your photo for the tilted avatar card in the hero.
(Hero.tsx currently shows a gradient placeholder.)

WORK -- REINDEER AUTO CASE STUDY (/work/fleet-logistics-oms)

Present -- exported from Figma into public/images/reindeer/:
hero-oms.png OMS order-detail hero screenshot
discovery-1.png Step 1 "Deep Discovery" workflow image
screen-dashboard.png Personalizable Dashboard screenshot

Still needed for full fidelity (states not in the shared Figma frame, so not yet built out on the page):

discovery-2.png Step 2 "Collaborative Design" image
(currently a cream placeholder)
screen-route-planning.png Route Planning panel screenshot
screen-automated-billing.png Automated Billing panel screenshot
screen-managed-services.png Managed Services panel screenshot
The "key screens" accordion shows the Dashboard panel open;
the other three panels are collapsed until their screenshots
+ copy are provided.

PLAY PAGE

Play is currently a "Coming soon" placeholder -- no experiment tiles are rendered, so none of these are needed yet. Once Play is built (1:1 tiles):

play-type-explorations.jpg	1:1	Type explorations
play-icon-set.jpg	1:1	Icon set
play-motion-studies.jpg	1:1	Motion studies
play-side-project.jpg	1:1	Side project
play-illustrations.jpg	1:1	Illustrations
play-weekend-build.jpg	1:1	Weekend build

SITE-WIDE

favicon.ico	32x32 / 16x16	Replaces src/app/favicon.ico
resume.pdf	--	Linked from the Connect page

NOTE

The old generic case-study template (CaseStudyHeader, MetaStrip, MetricsGrid) has been removed. The Reindeer Auto case study is now a bespoke page built 1:1 from Figma (src/components/casestudies/ReindeerCaseStudy.tsx). Remaining Work entries (career-buying-journey) still show a "Coming soon" placeholder until their designs are provided.

Suggested location: public/images/ (Reindeer assets live in public/images/reindeer/).
